

CA4: Module Specification

Along with the Course Specification, Module Specifications form the definitive description of any qualification awarded by the University. The Academic Quality and Standards Office (AQSO) is responsible for maintaining up to date records of all definitive documents (course and module specifications). **Any** amendments made to the Module Specification must be submitted to the AQSO via the formal Amendments process outlined in Section 4 of the Academic Quality and Standards Handbook 2019 – Amending Courses.

Indicative sections of the Module Specification should be generic in order to limit the number of amendments to minor details of the module content, e.g. 'students will learn to use current software' rather than specifying particular software that may change in the future.
